

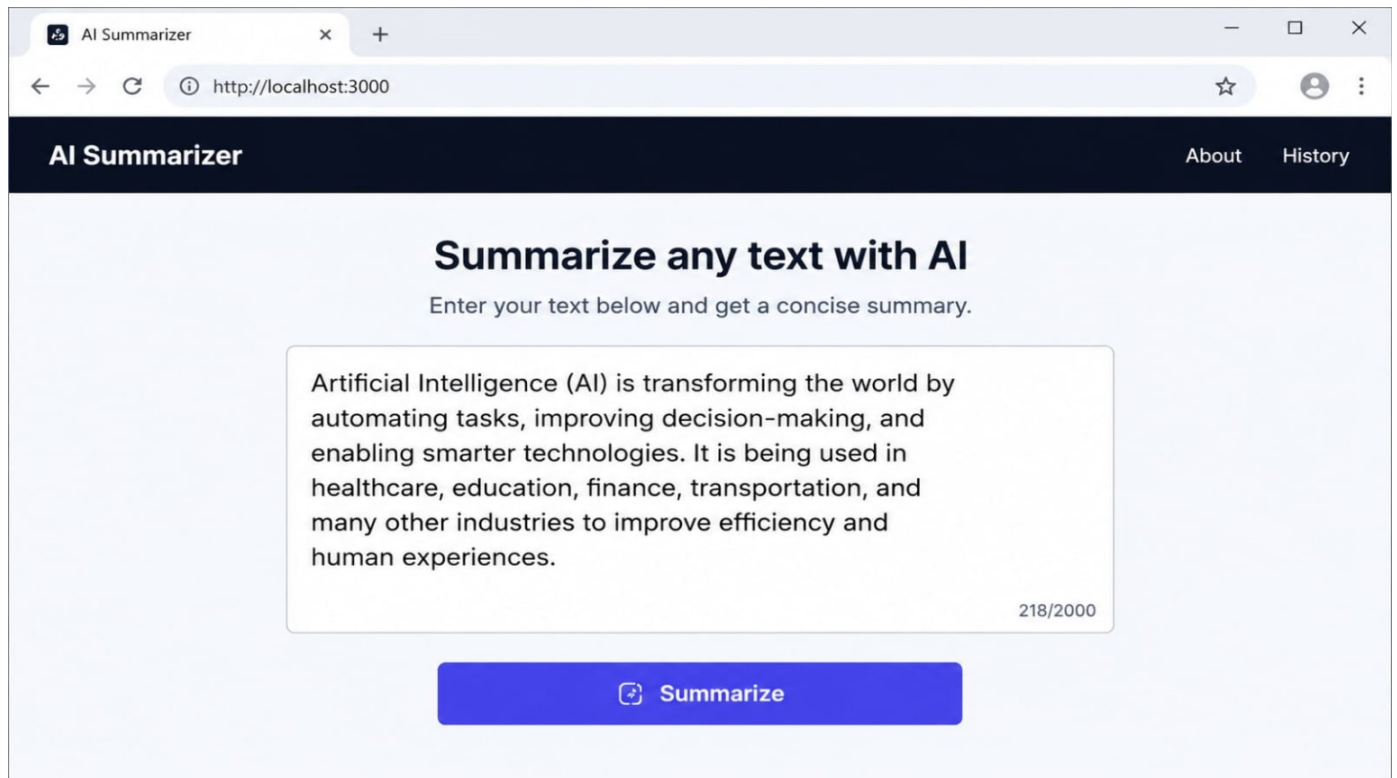

Figure 1: AI Summarizer - Input text screen

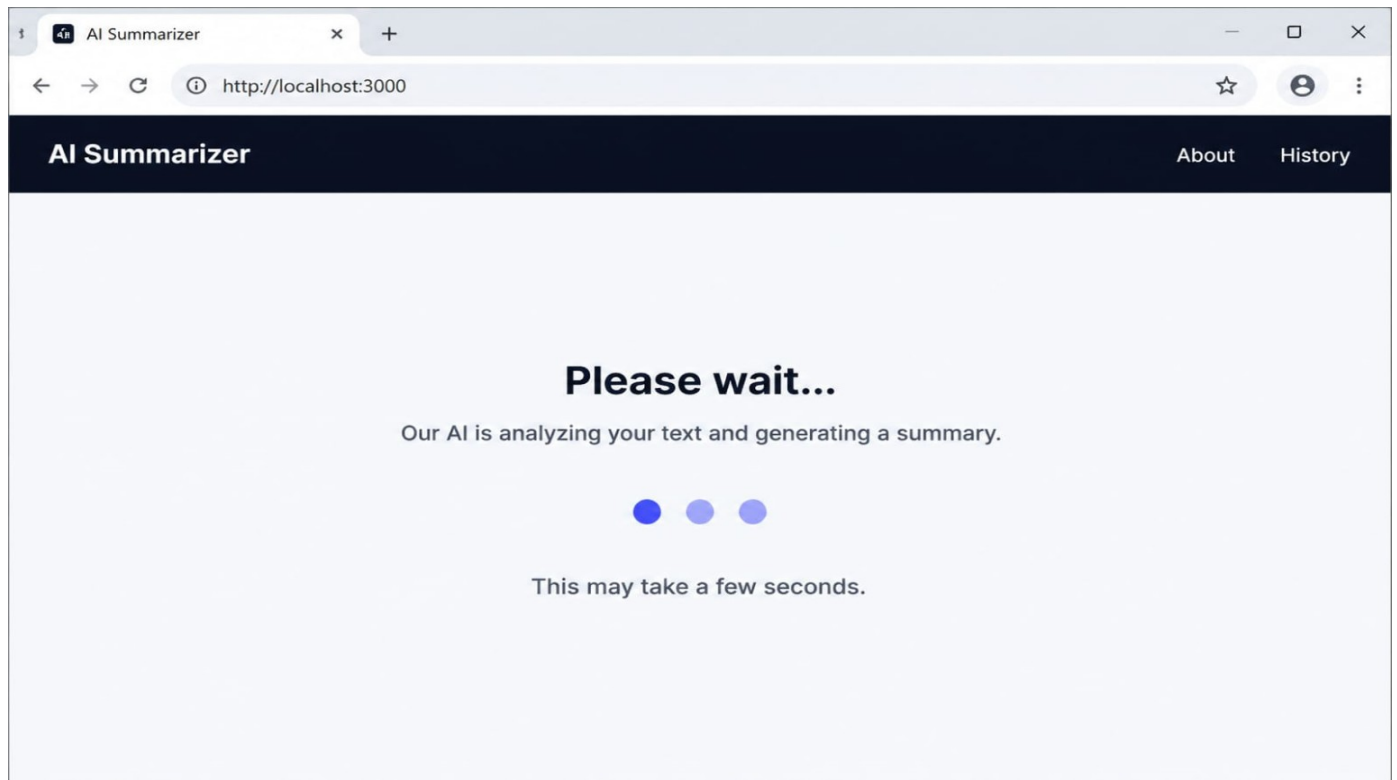

Figure 2: AI Summarizer - Loading and processing screen

The screenshot displays the 'AI Summarizer' web application in a browser window at `http://localhost:3000`. The application's interface includes a header with 'About' and 'History' links, a success message 'Summary generated successfully!', a 'Summary:' section containing a paragraph about AI's impact, and two buttons: 'Copy Summary' and 'Summarize Another'. At the bottom, it shows statistics: '1 / 15 requests', '1.2 kB / 5.6 kB transferred', and '1.0 kB / 12.8 kB resources'.

The right side of the image shows the Chrome DevTools Network tab. The 'summarize' request is selected, showing a status of 200 OK. The request details are as follows:

Name	Headers	Payload	Response	Preview	Timing
summarize	General Request URL: <code>http://localhost:5000/api/ai/summarize</code> Request Method: <code>POST</code> Status Code: <code>200 OK</code> Remote Address: <code>[::1]:5000</code> Referrer Policy: <code>strict-origin-when-cross-origin</code> Response Headers View source Content-Type: <code>application/json; charset=utf-8</code> Content-Length: <code>216</code> Date: <code>Mon, 27 May 2024 10:15:38 GMT</code> Connection: <code>keep-alive</code> Keep-Alive: <code>timeout=5</code> Request Headers View source Content-Type: <code>application/json</code> Authorization: <code>Bearer eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9....</code> User-Agent: <code>Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36...</code> Accept: <code>application/json, text/plain, */*</code>
